

The Institute of Pure and Applied Physics

The Institute of Pure and Applied Physics (IPAP) is a non-profit organization for the purpose of publishing physics-related journals and other relevant scientific and technological information.

IPAP provides an efficient web-based system for the sharing and exchange of information in the scientific and technological community. In addition to the traditional print medium, we have multimedia publishing activities, including electronic publishing on-line and publication through CDs, DVDs, and other advanced media. Our fast and flexible production system will serve the diverse media needs of today's scientific community.

Our strategy is to actively pursue "hot-from-the-lab" research findings and to rapidly disseminate this information to the worldwide scientific community. We plan to provide cutting-edge information tailored to the research needs of the individual subscriber through the most user-friendly and efficient means of delivery.

Visit <http://www.ipap.jjap.or.jp> for more details about our publishing activities.
